

Science

In Science, we will be completing a unit all about the Seasonal changes which take place in Spring and Summer time. We will learn about the changes in weather, and the clothes we wear, as well as the day length. We will measure the amount of rainfall and the temperature during the unit and talk about any changes or patterns we might see!

Computing

Children will explore the use of animation to make their own stories, and begin to use coding while continuing to use Purple Mash.

History

In History, children will be learning all the history of our school, and the main key events in it's past to create a timeline. We will then begin to learn about life in the Victorian era, and how different being a child would have been compared to our lives today. We will explore the life of Samuel Wilderspin and begin to think about why he was significant, and what impact he had on the world.

Geography

We will do some local fieldwork and explore our locality. We will also explore the importance of looking after our environment and not littering.

School Days

PE

This half term, Y1 will have Bee Active on **Tuesdays**. In the Summer term we will begin our Forest Schools sessions. These will take place on **Wednesday** afternoons. Children need to come in PE kit on both days.

RE

We will be considering what it means for some individuals to live as part of a faith community, and the impact it has on their lives. We will continue to develop our knowledge of Judaism, asking, who is Jewish and how do they live?

Maths

We will begin the summer term learning to multiply and divide, and use 2, 5, 10 times tables. We will then begin a unit on fractions, and will develop our understanding of halves and quarters of shapes and numbers.

DT

In DT, children will be making their puppets and practising the best joining techniques including glueing and stapling. We will also be designing and making superfood smoothies and giving them a taste test!

English

Our class text is Old Bear. We will begin to explore the story and create storyboards. Then the children will retell the start of the story and add their own innovated parts.

Art

In Art we will study the work of James Rizzi and his Street View landscape art. As a class, we will work together to create a mural of our local area and arrange this together.
